LearnPython Tutorials Part Two

The screenshot shows a Python tutorial interface. On the left, a code editor labeled 'script.py' contains the following code:

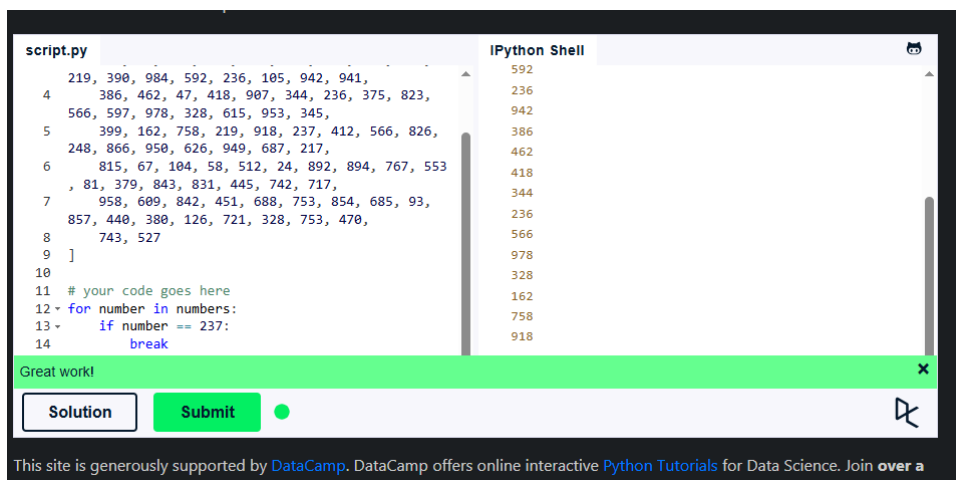

```
1 # change this code
2 number = 20
3 second_number = 0
4 first_array = [1,2,3]
5 second_array = [1,2]
6
7 if number > 15:
8     print("1")
9
10 if first_array:
11     print("2")
12
13 if len(second_array) == 2:
14     print("3")
15
16 if len(first_array) + len(second_array) == 5:
```

On the right, the 'IPython Shell' displays the output of the script:

```
<script.py> output:
1
2
4
5
6

<script.py> output:
1
2
3
4
5
6
```

At the bottom, a green status bar says 'Great Work!' and a 'Submit' button is visible.

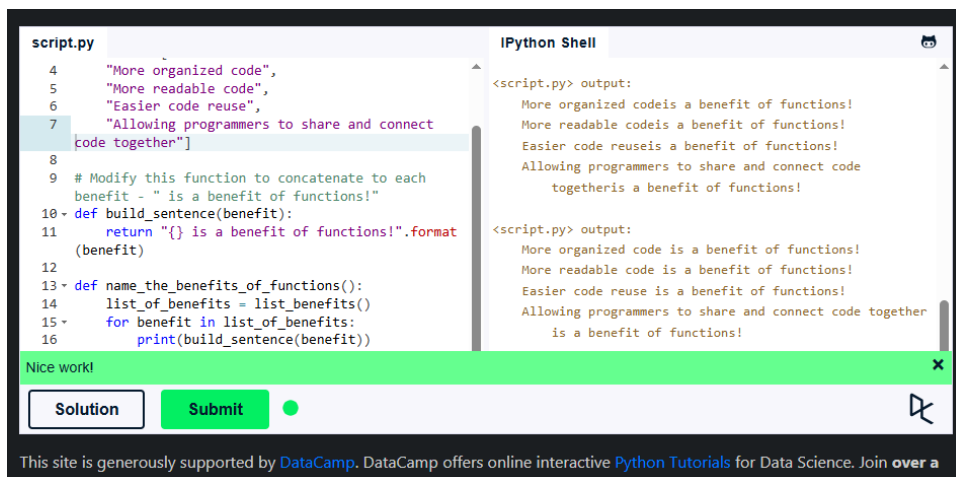

The screenshot shows a Python tutorial interface. On the left, a code editor labeled 'script.py' contains the following code:

```
1 219, 390, 984, 592, 236, 105, 942, 941,
2 386, 462, 47, 418, 907, 344, 236, 375, 823,
3 566, 597, 978, 328, 615, 953, 345,
4 399, 162, 758, 219, 918, 237, 412, 566, 826,
5 248, 866, 950, 626, 949, 687, 217,
6 815, 67, 104, 58, 512, 24, 892, 894, 767, 553
7 , 81, 379, 843, 831, 445, 742, 717,
8 958, 609, 842, 451, 688, 753, 854, 685, 93,
9 857, 440, 380, 126, 721, 328, 753, 470,
10 743, 527
11 ]
12
13 # your code goes here
14 for number in numbers:
15     if number == 237:
16         break
```

On the right, the 'IPython Shell' displays the output of the script:

```
592
236
942
386
462
418
344
236
566
978
328
162
758
918
```

At the bottom, a green status bar says 'Great work!' and a 'Submit' button is visible.

The screenshot shows a Python tutorial interface. On the left, a code editor labeled 'script.py' contains the following code:

```
1 "More organized code",
2 "More readable code",
3 "Easier code reuse",
4 "Allowing programmers to share and connect
5 code together"]
6
7 # Modify this function to concatenate to each
8 benefit - " is a benefit of functions!"
9
10 def build_sentence(benefit):
11     return "{} is a benefit of functions!".format
12     (benefit)
13
14 def name_the_benefits_of_functions():
15     list_of_benefits = list_benefits()
16     for benefit in list_of_benefits:
17         print(build_sentence(benefit))
```

On the right, the 'IPython Shell' displays the output of the script:

```
<script.py> output:
More organized code is a benefit of functions!
More readable code is a benefit of functions!
Easier code reuse is a benefit of functions!
Allowing programmers to share and connect code
together is a benefit of functions!

<script.py> output:
More organized code is a benefit of functions!
More readable code is a benefit of functions!
Easier code reuse is a benefit of functions!
Allowing programmers to share and connect together
is a benefit of functions!
```

At the bottom, a green status bar says 'Nice work!' and a 'Submit' button is visible.

script.py

```
8     desc_str = "%s is a %s %s worth $%.2f." %
9     (self.name, self.color, self.kind, self.value)
10    return desc_str
11
12    # your code goes here
13    car1 = Vehicle()
14    car1.name = "Fer"
15    car1.kind = "convertible"
16    car1.color = "red"
17    car1.value = 60000.00
18
19    car2 = Vehicle()
20    car2.name = "jump"
21    car2.kind = "van"
22    car2.color = "blue"
23    car2.value = 10000.00
24    # test code
```

IPython Shell

```
<script.py> output:
Fer is a red convertible worth $60000.00.
jump is a blue van worth $10000.00.
